RE: Pretium Farm PID Analysis

Cole and Britain:

We have prepared an initial analysis regarding the estimated reimbursement capacity of your Collin County Public Improvement District ("PID" or the "Project") project called Pretium Farm. We have based our analysis on information provided by Forestar (the "Developer") on January 29, 2026. The assumptions for the reimbursement analysis are detailed below.

- 201 lots across three different products (40's, 50's, and 60's)
    - Blended ASP of $375,000
- We have not assumed inflation or additional assessed valuation growth
- Per the Developer, we have assumed three different tax rate scenarios (prior to a TIRZ offset)
- An interest rate of ~7.00% has been assumed (includes estimated additional interest and administrative fees)
- Capitalized interest
- The bonds will be issued with a 30-year final maturity
- Annual collection and maintenance fees of $75.00 (inflating at 2% per year)

Based upon these assumptions, the potential reimbursement capacity is summarized in the table below. Many factors could influence the potential net proceeds back to the developer including City development fees, additional development information and variations to the assumptions above.

| Effective Tax Rate | Avg. Gross Annual Assessment | Avg. Est. Total Assessment Per Lot | Est. Net Proceeds to Developer [1] |
|---|---|---|---|
| **$0.850** | $3,188 | $39,392 | **$6,552,387** |
| **$1.000** | $3,750 | $46,551 | **$7,763,206** |
| **$1.150** | $4,313. | $53,710 | **$8,959,960** |

*A Series 2028 and Series 2029 bond financing have been assumed. Please refer to the following pages for more detailed information.*

Please call us with any questions or comments regarding the analysis.

Sincerely,

**Evan Kist, CFA**
